

Brazilian Butterflies

There are roughly as many butterfly species as there are birds in Brazil. The following butterflies were seen by Barbara Driscoll or Dennis Deck during a Portland Audubon birding trip to Brazil in April of 2015. Identification was based upon *Butterflies of Southern Amazonia* (Garwood and Leman) and websites *Neotropical Butterflies* (Garwood), *Butterflies of America!* (Warren), *Butterfly Catalogs* (Garwood and Jaramillo), and *Butterflies of the Amazon and Andes* (Hoskins) but may be in error.
