

Ecuador Butterflies

I took these photos during trips with David Gaelle of Mariposa Butterfly Tours (11/2023) and Dan van den Broek of Portland Audubon (birding 10/2017) in Pichincha and Napo Provinces of Ecuador. My tentative ID was based on material from *Calydna* (Gaelle) and *Butterfly Guides* (Garwood and Velasquez) with assistance from David Gaelle. Websites *iNaturalist*, *Butterflies of the Amazon and Andes* (Hoskins) and *Neotropic Butterflies* (Garwood) were also helpful since no source is complete. Recent changes in taxonomy have been implemented in a few sources. Names are given as “**English (Latin)**”. Conventions are: (a/b c) indicates new/old genus name and (a b/c) indicates b or c species. Species seen in 2017 are marked with 7.
