

Manu-ARCC Butterflies Seen

I took these photographs during a November 2021 trip to Peru with David Gaele and a half dozen enthusiasts. Sources for identifying species included extracts from David's Calydna website for Manu Road (Cusco) and ARCC (Madre de Dios), a draft PDF by Kim Garwood and Juan Guillermo Jaramillo V., Kim's Neotropical Butterflies, Adrian Hoskins's Butterflies of the Andes and Amazon, and Andy Warren's Butterflies of America. David corrected my ID in many cases but responsibility for any errors is mine. Photos marked with [RC] were taken by Randy Countryman who was on the trip.

Due to recent changes in scientific names, I indicate the former name in []. Common names are provided for the latin challenged among us. *Dennis Deck*
